

At SANEON our greatest passion is the challenge. The complex development of safe autonomous and automated vehicles (including aircrafts) is at the center of our interest. We work for world renowned customers in the automotive and aerospace industries. Our know-how and strong analytical skills enable our customers to realize their vision.

We are growing and looking for a **permanent** position for our location in **Paris (France)** :

Automotive SPICE ® Assessor (m/f/d)

Your tasks

- You will plan, coordinate and conduct various Automotive SPICE ® assessments in an international environment
- You are responsible for the follow-ups after an assessment (coaching in the implementation of the defined measures) and you are the first contact person for the customer
- You advise the organizational units with regard to their process development
- You prepare and conduct Automotive SPICE ® events (training courses) and enable our customers in the field of process optimization according to Automotive SPICE ® and ISO 26262
- As part of the management team, you support the company's development with regard to customer acquisition

Your profile

- Convincing degree (computer science, electronics, electrical engineering, mechanical engineering or comparable qualification)
- Relevant professional experience in the area of Automotive SPICE ®
- Training or further training as a Provisional Assessor, Competent Assessor or Principal Assessor for Automotive SPICE ® with several years of experience
- Knowledge of functional safety (ISO 26262) is an advantage
- Excellent problem-solving, communication and moderation skills (very good written and spoken English, German language skills optional)
- You have consulting/training or project management experience
- Ability to interact with business partners on several hierarchical levels

We offer

- A challenging and interesting range of tasks in relation with the development of safety-critical functionality, such as autonomous driving and flying in international contexts
- The opportunity to get to know and support different companies
- Independent activities, further training and flexible working hours
- Our flat hierarchies and open communication structures promote a pleasant working environment in which you feel comfortable and can actively shape your working environment
- We offer future-oriented tasks in an international environment as well as an attractive and performance-related compensation
